

Hello,

I have reviewed the Alternative 2 and met with members of Midas Gold Idaho to better understand the company's plans for the Stibnite Gold Project. Below are my comments on the plan to be included in the comment period.

What I like about Midas Gold's plan is that it offers solutions for damage caused by legacy operations and creates a brighter future for the site. For example, Midas is cleaning up old mining waste from projects dating back to the WWII era. I know that Alternative 2 is a holistic proposal that addresses existing issues and protects against their reoccurrence. Tailings are just one issue related to mining projects, and Midas is addressing them directly. Under Alternative 2, the company will construct a long-term storage facility for future waste from mining operations. The facility is designed to withstand an earthquake up to 6.5 on the Richter scale. I feel confident the company has considered multiple scenarios in the design, so it will be able to operate continuously with no problems in order to protect the environment.

The comment period for the project was already extended once. The U.S. Forest Service has given the public more than adequate time to comment, plus tools that make reviewing the document easy and a virtual meeting room to make information more digestible. It is with this knowledge that I encourage the U.S. Forest Service to continue to move the project forward and permit the site using alternative 2 as the guide.

Most Respectfully,

Name: William Foss
