

To Concerned Payette National Forest Staff,

I am writing to share my thoughts on Midas Gold Idaho's Stibnite Gold project. There are many reasons why I am excited for Midas Gold's project to come to life and I hope through my comments you will understand why.

The team at Midas has spent countless hours researching and designing the best possible solution for water quality conditions at the site. By cleaning up the legacy tailings that are currently sitting unlined in the valley floor, Midas will improve the water quality for fish, wildlife and nearby residents. Alternative 2 includes a plan to neutralize the metals in the tailings before they are stored in the fully lined facility. This will greatly improve ground and surface water conditions at the site and be a big step forward to improving the environmental conditions at the site. I prefer Alternative 2 because it will allow bring solutions to the site in the most timely manner. Alternative 3 and 4 would delay these benefits by two years and, sadly, Alternative 5 would leave the site as it is today and conditions would likely only get worse.

Midas Gold Idaho wants to invest \$1 billion in our state, bring more than hundreds of jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. The U.S. Forest Service has provided Idahoans with meaningful tools to easily review the document and ample time to comment. I highly encourage the U.S. Forest Service to permit this project following alternative two.

Respectfully,

Name: Glenn A LaZelle
