

Linda Jackson,

Midas Gold Idaho's Stibnite Gold Project presents Idaho, particularly rural Idaho, with a huge economic and environmental opportunity. I am writing to encourage you to permit the project as quickly as possible.

The team at Midas has spent countless hours researching and designing the best possible solution for water quality conditions at the site. By cleaning up the legacy tailings that are currently sitting unlined in the valley floor, Midas will improve the water quality for fish, wildlife and nearby residents. Alternative 2 includes a plan to neutralize the metals in the tailings before they are stored in the fully lined facility. This will greatly improve ground and surface water conditions at the site and be a big step forward to improving the environmental conditions at the site. I prefer Alternative 2 because it will allow bring solutions to the site in the most timely manner. Alternative 3 and 4 would delay these benefits by two years and, sadly, Alternative 5 would leave the site as it is today and conditions would likely only get worse.

Reviewing Midas Gold's plans it is clear to me the company really believes in taking care of the environment and keeping the community safe. I urge you to permit the Stibnite Gold Project using alternative two and keep this project moving forward. The comment period has been extended by 15 days once already, please keep the comment period to 60 days, so we can prevent additional delays.

BTW: What a great opportunity to have a deep pocketed Corporation on the hook for their clean-up and restorations and make right sins of the past! I know that documents can be crafted to make it so if in fact not already done.

Time to move this forward.

Most Respectfully,

Name: Scottie & Jackson Cooper
