

Attention payette national forest supervisor,

I am writing to express my full support of Midas Gold Idaho and the Stibnite Gold Project. Midas Gold has shown they are committed to Idaho and want to take care of the environment. I hope you move forward and permit this project as quickly as possible.

Alternative 2 is the best proposal for Idaho communities. This alternative promises to create hundreds of local jobs. Midas Gold has committed to purchasing supplies locally as much as possible and have already spent millions in Idaho to date. The company predicts it will directly employ somewhere around 500 people during construction and operations of the mine. Independent studies also show hundreds of indirect jobs will be created as a result of the Stibnite Gold Project during both phases of the project. I am excited about the opportunities this could bring for Idaho families especially as our nation attempts to recover from the ongoing pandemic. But besides the economic benefits, the project will help our environment. Right now, the area of the proposed mine is a brownfields site. Cleaning it up will be expensive. And no one else is proposing to do the work besides Midas Gold. If the Stibnite Gold Project doesn't move forward, this burden will fall to us as taxpayers or more likely, the site may never get cleaned up at all.

Midas Gold Idaho wants to invest \$1 billion in our state, bring more than 1,000 jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. And with the coronavirus, we need it now more than ever. The USFS has provided sufficient time to review the document and provide comments. It is time to move forward. I highly encourage the U.S. Forest Service to pick alternative 2 as the preferred alternative for the Stibnite Gold Project.

My best,

Name: Simon dearden
