

I would like to submit a letter of SUPPORT for the Midas Gold Project - Stibnite.

Midas Gold has done their due diligence in creating a plan for this site. They have completed more plans than probably necessary and they are doing it for an added benefit of cleaning up the environment. It will take time to get the project complete, however, I believe they will do a fantastic job. As added bonuses, creating jobs and a new economic driver in this region is very needed.

This project will benefit my children and grandchildren and future generations. Not just jobs, but a clean and safe environment.

The project has taken into account the cultural significance of the settlers in the area as well as that of the Native American. Without cleaning the site none of this would be a benefit and instead a continuous eye sore and mark on that of the settlers that came to the area to mine and left.

In closing, I humble request that the plan and project be approved and all of us can back to work!

Name: Jacob "Mac" Qualls
