

To Concerned Payette National Forest Staff,

Thank you for the opportunity to provide my feedback as part of Midas Gold Idaho's public permitting process.

As part of the Stibnite Gold Project, Midas Gold will be responsible for mitigation and restoration related to its new mining activities. Mining companies must reclaim the land when their operations are completed and provide state and federal regulators with reclamation bonds to guarantee the work will be properly performed before any mining begins. That means the plans put forward by Midas Gold are not optional. The Draft Environmental Impact Statement (EIS) released in August thoroughly details the environmental issues hurting the region's environment and ecosystem. I believe Alternative 2 provides the best option for removing and storing hazardous waste that has been putting antimony and arsenic into water for decades. The draft EIS states that solutions from Midas to remove legacy waste and manage water provides long-term reduction in metal loading in ground and surface water. (Ch. 4 Section 4.9)

Midas Gold Idaho wants to invest \$1 billion in our state, bring more than 1,000 jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. And with the coronavirus, we need it now more than ever. The USFS has provided sufficient time to review the document and provide comments. It is time to move forward. I highly encourage the U.S. Forest Service to pick alternative 2 as the preferred alternative for the Stibnite Gold Project.

Thanks for your Consideration,

Name: Margaret Henning
