

Attention Forest Service,

Thank you for the opportunity to comment during the Draft EIS period for the Stibnite Gold Project.

The intent of my comment is to offer a professional opinion of Midas' due diligence that will aid in a successful project while considering 3rd party impacts. As a tunnel engineering who works for primarily in the municipal market with occasional private project I have learned to identify and beware of corner-cutting project approaches. Midas' methodology to the feasibility and design of the tunnel portion on this project leads me to believe they'll use a sound and practical approach to the overall project. Midas' hiring of a 2nd engineering firm to validate the approach taken by the prime design firm shows their consideration for the project and surround environment.

Cheers

Benny
