

TO WHOM IT MAY CONCERN,

Midas Gold Idaho has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of our community. They've volunteered their time in our schools and given generously to community causes. The company's track record of following through on its promises and doing the right thing gives us the confidence to write in support of permitting the Stibnite Gold Project.

Midas Gold is very aware of the water quality concerns at site and has been sampling it for years. They've found very high arsenic and antimony levels in certain areas, in some cases 700 times worse than what is considered safe. To address these issues, the company will remove legacy tailings and other waste that cause this issue. Overall, Alternative 2 seems to cover every risk factor possible; it improves upon the company's original 2016 plan, which they adjusted following feedback, and it is superior to Alternatives 3 and 4, which have more safety concerns and could cause delays. And of course, it is better than Alternative 5, which is to do nothing; we cannot afford that approach after all these years.

Midas Gold Idaho wants to invest \$1 billion in our state, bring more than hundreds of jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. The U.S. Forest Service has provided Idahoans with meaningful tools to easily review the document and ample time to comment. I highly encourage the U.S. Forest Service to permit this project following alternative two.

Most Respectfully,

Name: Stephen Saroki
