

U.S.F.S.,

I am writing in support of the Stibnite Gold Project. Thank you for the opportunity to provide my feedback as part of the National Environmental Policy Act.

I have witnessed Midas Gold go above and beyond normal operating procedures concerning conservation, reclamation, safety, and environmental stewardship at Stibnite. In these times it is so valuable to have responsible Mining ventures that actually care about the environment, provide good paying jobs and pump revenue and real wealth into local, rural communities. The Eco-Warriors in New York City and Los Angeles would have us relegate all mining to foreign countries that certainly do not adhere to responsible resource extraction. If we truly care about the environment then we need to increase Americas responsible extraction industries that are held to the highest standards in the world, and lessen the demand to import minerals. We need this Mine.

Respectfully,

Kirby Donald.
