

Dear Payette National Forest Supervisor,

If Midas Gold Idaho is allowed to move forward with the Stibnite Gold Project, they will reclaim an area impacted by historical mining, create hundreds of well-paying jobs and provide a huge boost to our economy in the process. It is a win-win for Valley County. We need to permit the project.

After reviewing the DEIS, I hope the U.S. Forest Service will select Alternative 2, as it seems to be the best option for the site. Under this alternative, Midas Gold designed a very safe Tailings Storage Facility, with 90 percent surrounded by granite mountains and the rest retained by a dam buttressed by 65 million tons of course rockfill. To date, the company has a stellar safety record. They have a nearly decade-long record of transporting hazardous materials without incident; since 2011, they've conducted over 195 successful fuel hauls involving 279 fuel trucks and have gone several years without a significant spill. If the other alternatives are selected, it could slow down the environmental and economic benefits of the project “ in the case of Alternative 5, it could even mean the site receives no attention and the problems we are experiencing today would simply remain.

While the economic benefits of this project cannot be ignored, it also will transform an area in need for environmental repair. It is for all of these reasons that I encourage you to move the Stibnite Gold Project forward as outlined in alternative 2 within this 60-day comment period.

Respectfully,

Name: Patricia Phelps
