

Dear Linda Jackson,

I am a huge fan of environmental preservation. However, I am an even bigger fan of striking the balance between that and economic progress. If there is a clear opportunity to move forward with creating jobs, boosting the local economy etc. while at the same time leaving little negative environmental impact, then this is the kind of project that should be moved forward. I believe in the management team at Midas Gold and their commitment to the environment and the communities.

We are going through a period in history right now with both the economy and the environment needing a break. This is a project which can accomplish both.

Respectfully,

Faye Gopaul
