

Dear Ms. Jackson,

It is with great pleasure that I write to the U.S. Forest Service to encourage you to permit the proposed activities outlined by Midas Gold in Alternative 2 during this public input process.

The U.S. Forest Service's online meeting room has made it easy to review the document and comment within the 60-day timeframe. Looking at the document, there is a clear advantage to Alternative 2 compared to the other options. According to a figure in Chapter 4, Hanger Flats pit lake would fill by year 14 of operations in Alternative 2. Under Alternative 1, it would take 19 years. The faster the lake fills up, the faster groundwater levels will recover around the lake. Alternative 3 and 4 would both delay the project by two years and cost substantially more. Alternative 3 would also place the tailings storage facility in a pristine reach of the East Fork of the South Fork of the Salmon River. While Alternative 4 would put mine traffic to site right next to the river.

This Stibnite Gold Project is a huge opportunity for Idaho. I am grateful for the tools the Forest Service has provided to review the DEIS and learn more about the project. These tools have given Idahoans sufficient time to comment. Please permit alternative 2 and continue moving the project forward so our citizens can reap the positive impacts.

Regards,

Name: Thomas Davis
