

Dear US National Forest Service Staff,

Thank you for the opportunity to comment on Midas Gold Idaho's Alternative 2. Over the last several years, I've had the opportunity to hear a handful of presentations on the Stibnite Gold Project, sit down with project staff and observe how the company has lived out its mission as it has grown. It is with this knowledge that I encourage you to permit the Stibnite Gold Project.

Midas Gold has worked hard to ensure the safety of the community during construction and operations of the Stibnite Gold Project. To minimize travel near important waterways, Midas Gold has proposed using Burntlog Road. This allows the company to take advantage of existing Forest Service roads and reduce travel on Johnson Creek and South Fork Road and both of which are heavily used by recreationalists. This plan maximizes safety and ensures all Idahoans have access to our public lands.

I urge you to accept Midas Gold's plan as outlined under alternative two. The U.S. Forest Service has provided the public with helpful virtual tools and materials to submit meaningful comments on the project within the allotted timeframe. It is time to move this project forward.

Best regards,

Name: Vernon Preston
