

Greetings,

It is with great pleasure that I write to the U.S. Forest Service to encourage you to permit the proposed activities outlined by Midas Gold in Alternative 2 during this public input process.

Alternative 2 is the result of many years of study by Midas Gold. The company developed this alternative after submitting their original plans and working with stakeholders, community members and environmental groups to try to determine how it could be improved. The result was a smaller project footprint, reconnecting salmon to their native spawning grounds before mining ever begins and improved water quality. Two of the alternatives, 3 and 4, would delay the project by several years and withhold its benefits from Idahoans unnecessarily. Those same alternatives could also become so expensive it could make the project cost prohibitive. With everything happening in the world, I feel strongly that we need to Stibnite Gold Project to move forward now. It would bring 500 well-paying jobs to rural Idaho, invest a billion in Idaho and help improve community infrastructure.

The Stibnite Gold Project is the type of project our state needs. I highly encourage the U.S. Forest Service to permit this project, using alternative two presented by Midas Gold, as expeditiously as possible. There is no need to extend the comment period. Sixty days is plenty of time to comment and we need the benefits of this project now.

Have a good day,

Name: Allan Rothlisberg
