

Dear Permitting Officials,

I am proud to submit my comments in support of Midas Gold Idaho's Stibnite Gold Project. This project presents our state with an incredible opportunity to bring well-paying jobs to rural Idaho, boost our state's economy and use private investment to clean up a brownfield site.

I support Alternative 2 of the DEIS. Under this plan, Midas Gold will help mitigate the damages left by previous mining projects, bring hundreds of well-paying jobs to Valley County and provide the only domestically mined source of antimony in the country. This project would allow our nation to rely less on foreign countries for critical minerals and reduce our carbon footprint by sourcing minerals at home. Environmental regulations are stricter in the United States and when minerals are sourced in this country we do not have to expend as much energy and resources transporting them to their final destination. Alternative 2 is economically and technically feasible. Alternatives 3 and 4 have not been adequately analyzed for technical feasibility and would be more costly. It is clear Alternative 2 is the best choice moving forward.

For the above reasons and many more, please move forward with alternative 2 of the Stibnite Gold Project as it is important to all Idahoans. The comment period provides plenty of time to read the DEIS and submit comments. Further extensions of the comment period are unnecessary and will needlessly delay the project.

Sincerely,

Name: Mike Tylka
