

USFS,

I am writing to express my full support of Midas Gold Idaho and the Stibnite Gold Project. Midas Gold has shown they are committed to Idaho and want to take care of the environment. I hope you move forward and permit this project as quickly as possible.

One of the biggest challenges facing Idaho is having a trained workforce. Midas Gold not only plans to hire hundreds of Idahoans but the company will provide employees with training to build a more skilled workforce in Idaho. We applaud Midas Gold's commitment to helping Idahoans get valuable training that may not otherwise be available. This commitment by the company will help benefit Idaho families and allow Idaho to attract new businesses in the future.

Thank you for the thorough review of the Stibnite Gold Project. I urge you to now move forward and permit the mine using alternative 2, so Midas Gold can put Americans back to work.

I have been to the site and seen what is possible in terms of cleaning up the mess from the old Stibnite Bradley mine. During the war they did not worry about pollution, they were only concerned about production. Now is the time to clean this up and it will not be the state or feds who have to do it. It would be Midas Gold. It seems to me it is a win win situation, more jobs, improved environment and more revenue for the state and federal government. Please approve this project.

Thanks for your time, Sincerely Lawrence Kiser, former prosecutor and Idaho resident
