

U.S.F.S.,

I am writing to express my full support of Midas Gold Idaho and the Stibnite Gold Project. Midas Gold has shown its commitment to Valley County and the state of Idaho and I encourage you to adopt the proposed activities outlined in Alternative 2 during the permitting process.

The U.S. Forest Services online meeting room has made it easy to review the document and comment within the 60-day timeframe. Looking at the document, there is a clear advantage to Alternative 2 compared to the other options. According to a figure in Chapter 4, Hanger Flats pit lake would fill by year 14 of operations in Alternative 2. Under Alternative 1, it would take 19 years. The faster the lake fills up, the faster groundwater levels will recover around the lake. Alternative 3 and 4 would both delay the project by two years and cost substantially more. Alternative 3 would also place the tailings storage facility in a pristine reach of the East Fork of the South Fork of the Salmon River. While Alternative 4 would put mine traffic to site right next to the river.

The comment period for the project was already extended once. The U.S. Forest Service has given the public more than adequate time to comment, plus tools that make reviewing the document easy and a virtual meeting room to make information more digestible. It is with this knowledge that I encourage the U.S. Forest Service to continue to move the project forward and permit the site using alternative 2 as the guide.

My best,

Name: Danielle Swinford
