

Dear Ms. Jackson,

Thank you for the opportunity to comment on Midas Gold Idaho's Alternative 2. Over the last several years, I've had the opportunity to hear a handful of presentations on the Stibnite Gold Project, sit down with project staff and observe how the company has lived out its mission as it has grown. It is with this knowledge that I encourage you to permit the Stibnite Gold Project.

As part of the Stibnite Gold Project, Midas Gold will be responsible for mitigation and restoration related to its new mining activities. Mining companies must reclaim the land when their operations are completed and provide state and federal regulators with reclamation bonds to guarantee the work will be properly performed before any mining begins. That means the plans put forward by Midas Gold are not optional. The Draft Environmental Impact Statement (EIS) released in August thoroughly details the environmental issues hurting the region's environment and ecosystem. I believe Alternative 2 provides the best option for removing and storing hazardous waste that has been putting antimony and arsenic into water for decades. The draft EIS states that solutions from Midas to remove legacy waste and manage water provides long-term reduction in metal loading in ground and surface water. (Ch. 4 Section 4.9)

This Stibnite Gold Project is a huge opportunity for Idaho. I am grateful for the tools the Forest Service has provided to review the DEIS and learn more about the project. These tools have given Idahoans sufficient time to comment. Please permit alternative 2 and continue moving the project forward so our citizens can reap the positive impacts.

As a mine supervisor, I have seen the lengths that Midas gold is willing to go to, to put the environment and the community first. I have worked in mining for nearly 20 years and can tell you that very few times have I seen a company work so hard to right the wrong of the past, that they did not create, in order to make a better future for all. I believe the importance of this project is enormous.

Please keep my comments in mind,

Name: Jared Fifield
