

Attention payette national forest supervisor,

I am writing to express my views on Midas Gold Idaho's Stibnite Gold Project. The opportunity presented by the Stibnite Gold Project is compelling for many reasons and it is a project I am committed to seeing come to fruition.

The Stibnite Gold Project is a huge opportunity for Idaho and our country. While the site is rich in gold deposits it also has deposits of antimony – a mineral designated critical by the U.S. government. In fact, the Stibnite Gold Project is the largest known deposit of antimony in the country. We depend heavily on China for this mineral. Antimony is crucial to the defense and energy industries and is in many items we use on a daily basis, like our cell phones. Permitting the Stibnite Gold Project will allow us to have a domestic resource for this very important mineral.

Midas Gold wants to restore the rivers, wildlife and habitat near the Stibnite Gold Project site. We should let them. The Forest Service has given meaningful time to review the document and comment. Further extensions are not necessary and will only hurt Idahoans by delaying the benefits of the project. Please permit Alternative 2 of the Stibnite Gold Project as outlined in the draft Environmental Impact Statement.

Respectfully,

Name: Matthew Linus Savacool
