

TO WHOM IT MAY CONCERN,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of the public permitting process. I know this project will have a positive impact on the environment, communities surrounding the site and Idahoans.

I am grateful for the tools the USFS has provided to review the document. One area I was particularly interested in taking a closer look at was the tailings storage facility. I was happy to see in chapter 4 of the DEIS it says, "Based on the slope stability analysis of the proposed design of the TSF dam, failure of the TSF dam from a seismic event is considered to have extremely low probability." This is good news considering the recent earthquakes Idaho has seen. Additionally, I am impressed with the location of the TSF under Alternative 2. This alternative uses the mountains to help secure the facility and would mean the dam would only cover 10% of the entire perimeter. Whereas Alternative 3 would move the TSF to a pristine area "a subpar option.

This Stibnite Gold Project is a huge opportunity for Idaho. I am grateful for the tools the Forest Service has provided to review the DEIS and learn more about the project. These tools have given Idahoans sufficient time to comment. Please permit alternative 2 and continue moving the project forward so our citizens can reap the positive impacts.

Most Respectfully,

Name: Daniel Jones
