

USFS,

Midas Gold Idaho's Stibnite Gold Project presents Idaho, particularly rural Idaho, with a huge economic and environmental opportunity. I am writing to encourage you to permit the project as quickly as possible.

The U.S. Forest Service's online meeting room has made it easy to review the document and comment within the 60-day timeframe. Looking at the document, there is a clear advantage to Alternative 2 compared to the other options. According to a figure in Chapter 4, Hanger Flats pit lake would fill by year 14 of operations in Alternative 2. Under Alternative 1, it would take 19 years. The faster the lake fills up, the faster groundwater levels will recover around the lake. Alternative 3 and 4 would both delay the project by two years and cost substantially more. Alternative 3 would also place the tailings storage facility in a pristine reach of the East Fork of the South Fork of the Salmon River. While Alternative 4 would put mine traffic to site right next to the river.

While the economic benefits of this project cannot be ignored, it also will transform an area in need for environmental repair. It is for all of these reasons that I encourage you to move the Stibnite Gold Project forward as outlined in alternative 2 within this 60-day comment period.

My best,

Name: Robin Curtis
