

To whom it may concern,

I, along with many others here in Valley County are in favor of Midas Gold, and see it as a real positive for our communities. The pros immensely out weight the cons, as long as there is continual oversight by government agencies to ensure there are no catastrophe's that would impact the environment. Midas Gold has proven their commitment to local communities and the environment thus far, and I would imagine they would continue to do. Living in this part of Idaho, we the people would uphold that they do, and I believe Midas Gold understands that. So in short, please allow them to open Stibnite, I don't believe any of us would be sorry.

Most Respectfully,

Name: Riley Wilkins
