Subject: Comments on Stibnite Gold Project

U.S.F.S. Officials,

Midas Gold Idaho has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of our community. They've volunteered their time in our schools and given generously to community causes. The company's track record of following through on its promises and doing the right thing gives us the confidence to write in support of permitting the Stibnite Gold Project.

Given the history of the region, I was a bit skeptical when I first heard about this project, but it is clear that Midas is going out of their way to put environmental safety and restoration front and center. For example, according to the DEIS, "it is not anticipated that soils in most of these areas would recover naturally." However, Midas Gold can change the future of the site. The company is already composting and has further plans to help soils recover throughout the life of the project. After looking at the tools provided by the USFS, I feel strongly that Alternative 2 is the best option moving forward. It addresses the purpose and need of the agencies in a manner that provides environmental advantage and economic feasibility over the other analyzed alternatives. With so much promise for the site's future, I hope Alternative 5 is removed from the table. There is finally an opportunity to restore the site and it is an opportunity that shouldn't be passed up.

I found the 60 days allotted and the digital tools provided by the USFS meaningful and sufficient for public review. Midas Gold wants to restore the rivers, wildlife and habitat near the Stibnite Gold Project site. We should let them. Please permit the Stibnite Gold Project and continue to move this important project forward.

Please keep my comments in mind,

Larry & Mary Jane Mangum
