

Dear Permitting Officials,

Midas Gold Idaho's Stibnite Gold Project presents Idaho, particularly rural Idaho, with a huge economic and environmental opportunity. I am writing to encourage you to permit the project as quickly as possible.

I am grateful for the tools the USFS has provided to review the document. One area I was particularly interested in taking a closer look at was the tailings storage facility. I was happy to see in chapter 4 of the DEIS it says, "Based on the slope stability analysis of the proposed design of the TSF dam, failure of the TSF dam from a seismic event is considered to have extremely low probability." This is good news considering the recent earthquakes Idaho has seen. Additionally, I am impressed with the location of the TSF under Alternative 2. This alternative uses the mountains to help secure the facility and would mean the dam would only cover 10% of the entire perimeter. Whereas Alternative 3 would move the TSF to a pristine area – a subpar option.

Thank you for your time, consideration and for giving Idahoans meaningful time to comment on the Stibnite Gold Project. Alternative two is by far the best option in the DEIS.

Thank You,
Wilma
