

Greetings Ms. Jackson and Staff,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of Midas Gold Idaho's Draft Environmental Impact Statement. Public participation is a huge part of the permitting process and I appreciate the opportunity to share my thoughts.

The U.S. Forest Service's online meeting room has made it easy to review the document and comment within the 60-day timeframe. Looking at the document, there is a clear advantage to Alternative 2 compared to the other options. According to a figure in Chapter 4, Hanger Flats pit lake would fill by year 14 of operations in Alternative 2. Under Alternative 1, it would take 19 years. The faster the lake fills up, the faster groundwater levels will recover around the lake. Alternative 3 and 4 would both delay the project by two years and cost substantially more. Alternative 3 would also place the tailings storage facility in a pristine reach of the East Fork of the South Fork of the Salmon River. While Alternative 4 would put mine traffic to site right next to the river.

Thank you for your time, consideration and for giving Idahoans meaningful time to comment on the Stibnite Gold Project. Alternative two is by far the best option in the DEIS.

Thanks Again, lets get going responsibly, and get to work, I want a job in stibnite.

Name: Clark I Lewis
