Subject: It's time to permit Stibnite

DEAR MS JACKSON,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of Midas Gold Idaho's Comment Period. I have been closely following Midas Gold Idaho's plans since they first came into our state, in large part because much of the proposed project will take place on public land. The more I have learned about the project, the more excited I am about the possibilities it will bring into our state.

Given the history of the region, I was a bit skeptical when I first heard about this project, but it is clear that Midas is going out of their way to put environmental safety and restoration front and center. For example, according to the DEIS, "it is not anticipated that soils in most of these areas would recover naturally." However, Midas Gold can change the future of the site. The company is already composting and has further plans to help soils recover throughout the life of the project. After looking at the tools provided by the USFS, I feel strongly that Alternative 2 is the best option moving forward. It addresses the purpose and need of the agencies in a manner that provides environmental advantage and economic feasibility over the other analyzed alternatives. With so much promise for the site's future, I hope Alternative 5 is removed from the table. There is finally an opportunity to restore the site and it is an opportunity that shouldn't be passed up.

The comment period for the project was already extended once. The U.S. Forest Service has given the public more than adequate time to comment, plus tools that make reviewing the document easy and a virtual meeting room to make information more digestible. It is with this knowledge that I encourage the U.S. Forest Service to continue to move the project forward and permit the site using alternative 2 as the guide.

Best Wishes,

Steely Bowman
