

Payette National Forest,

As a 6th generation, Idahoan thank you for the possibility to touch upon Midas Gold Idaho's Alternative 2. Over the past few years, I've had the possibility to pay attention to a handful of talks at the Stibnite Gold Project. I inspire you to allow the Stibnite Gold Project. I trust the mission affords a plan to restore the surroundings and increase Idaho's economy - mainly below Alternative 2. Historic mining operations, improvement of the former townsite, and herbal tactics have led to substantial degradation of many factors of the surroundings. Loss of fish passage, ability water degradation from preceding mining activity, and immoderate erosion are all outstanding issues to our community. The Stibnite Gold Project could finance reclamation efforts to cope with those troubles and in turn, increase Idaho's economy. It is a win-win for our network. I urge you to approve the mission as Midas Gold in Alternative 2, it's far the nice of the options mentioned with the aid of using the USFS. The Stibnite Gold Project will offer a massive advantage to our community and the neighborhood surroundings. The USFS has taken significant measures to make certain the general public has had sufficient time and sources throughout the general public remark period.

Regards, Ruby Twilegar
