Subject: "Black Ram Project Objection"

I am opposed to any "timber harvest " in the Black Ram Project. ANY logging and the equipment necessary for logging will disturb the animals living in those units, and damage the ecosystem for many plants and animals, including the grizzly bears. Please leave all trees standing and expand any wilderness area there, for all things wild and to curb global warming. We need the trees STANDING to sequester carbon! There are many reasons to stop logging in this area and return it to a wilderness area. Thank you for your consideration, Kima Garrison
