 Phone: 208-373-4105
 Hours: M-F 9-4 p.m.

9-28-2020 FINAL Buck Fire Update

Buck Fire Wildfire
 News - 9/28/2020

This will be the final update unless significant fire activity occurs

Start Date: August 26

Location: 7 miles South of Yellow Pine, Idaho.

Cause: Lightning

Acres: 19,474

Contained: 33 percent

Personnel: 136

Resources: 2 crews, 1 helicopter, 2 water tenders and 14 engines

Conditions are looking good on the fire. Lower temperatures along with some precipitation have given the fire fighters a slight break. They are beginning to go into repair mode. They will start to pull hoses and pumps. They will repair any hand lines that need it while working any hot spots they find.

You can expect to see some smoke on the fire until the snow flies. These are interior smokes and should not pose a threat. Temperatures are supposed to be higher the next few days but with shorter days and the moisture we have had there will not be much drying of the fire area.

As repairs progress resources will be released a little at a time, the Nevada Interagency Team 3 will start the steps to return management of the fire back to the local units of the Forests.

Since the information will not change from day to day this will be the last update put out by this Team. You can still go to the internet sites listed below for any information.

Weather: The weather is predicted to be above average temperatures with no forecasted precipitation.

Closures: Fire managers have modified the area closures in place for firefighter and public safety during wildfire suppression activities. The new closure will be in place through Oct. 31, unless rescinded earlier.
