Subject: Marietta-Athens Pine Project, Athens
District of the Wayne National Forest: Objection

I object to the entire proposed Marietta-Athens
Pine Project.

My reason is global warming and climate change.
The world situation is to the point where not only
do carbon dioxide emissions have to be reduced but some
existing carbon dioxide in the atmosphere must be reduced.

The UN climate report says atmospheric carbon dioxide
levels must be reduced to pre-industrial levels by
2030 to avoid catastrophic consequences of global warming.

The proposed logging activities of the Marietta-Athens
Pine Project would contribute to carbon dioxide
emissions. I object to my federal government Forest
Service agency engaging in actions on my federal
public land which contribute to global warming.

I object to this project going forward and want
a moratorium on any logging activities in the
project area. I don't want a single tree to be cut.
