Re: Integrated Non-Native Invasive Plant Management Project – Draft Environmental Impact Statement (DEIS)

Ms. Luensmann,

Lincoln County has reviewed the DEIS for the Integrated Non-Native Invasive Plant Management Project and support implementation of the preferred alternative, Alternative B. The county supports the options for preventing, eradicating, suppressing and reducing existing and future spread of non-native invasive plant infestations on the Lincoln National Forests. The County also recommends the Forest Service consider using these options for preventing, suppressing and reducing the spread of native invasive plant species on the Lincoln National Forest.

Ira Pearson, Lincoln County Manager

Robert Barber, LANRAC Chairman
