Hello- We are adjacent to a small piece of Forest Service land in section 12 bordering Wa. and Hwy 41. We would love to see a fuel reduction there. It really needs it especially with more people moving into the area. We have lived here for 30 years. The lumber co. (IFI or Stimson) that has the land adjacent to the Forest Service land did a very poor job of fuel reduction in my opinion a couple of years ago.

Best Regards

Bruce Werner
