Subject: Resolution Copper Project at Oak Flat
Date: Thursday, February 18, 2021 9:32:53 AM

Forest Service - you must put a stop to the proposed land swap at Oak Flat. The Apache sacred ground, on which Resolution Copper is proposing to mine for copper, was made a protected area 60 years ago by President Dwight Eisenhower when he signed an executive order withdrawing Oak Flat from federal lands open to mining. He was right then, and the land should remain as the natural treasure that it is.

Lauren Redniss, in her book "Oak Flat", made it very clear as to the damage that such a mine brings with it - "An open pit mine is an enormous gash in the earth, an eyesore so spectacular it becomes sublime."

Stop Resolution Copper from its desecration of Apache sacred land. Stop the Land Swap process.
