5	6	1 Form Plus	I make my living and employee 30 people annually bringing hundreds of thousands of dollars into rural Idaho communities based on the Salmon River being healthy below the South Fork confluence.	McCall	ID
7	8			Bolse	ID
9	10		We sell fly fishing equipment all over the world and we are located here in Idaho, more specifically, Mccall. The reason we base our business here in Idaho is the proximity to world class public lands and clean water with healthy fish. This allows us to share our knowledge of fishing through imagery and content and largely drive sales through our content. After reading through some of the DEIS we did not find sufficient analysis pertaining to the impacts this mine would have on outdoor recreation and access in the area. We are well connected to many businesses in the fishing and outdoor community, not only in Idaho but all throughout the US. Recreation in Idaho is on the rise. With over \$7.8 Billion in annual recreation spending, that number will only continue to increase as long as Idaho provides the opportunities to recreate. Also, more outdoor and recreational compaise will bring their business to Idaho if they know that Idaho is a state that supports recreation. The Stibnite mine puts the image of Idaho as a recreational hub in jeopardy, and limiting access to recreation in order to make way for a mine is not only backtracking, but it sends a message that Idaho doesn't support its \$7.8 Billion recreational economy. When the State of Uthah Idin't come out in favor of protecting Bears fars National Monument, countless outdoor companies left the state as well as the state losing the Outdoor Retailer trade show and all of the money that was spent to get people to the show. The potential for people to raise their voice in protest to this project and for larger companies to get involved in speaking up could have a similar impact to		
11	12		helps us share a message that Idaho is wild. And we would love to see it stay that way. Allowing Midas Gold to reopen the Stibnite Mine will become one of the largest in the country! And once underway, they plan to expand even therefore the country! And once underway, they plan to expand even therefore the country! And once underway, they plan to expand even therefore the company that owns Midas Gold is not; ween from Idaho, or the United States, how will they understand this watershed means to the Nez Perce people, the summer Chinook Salmon, bull trout, or anyone or anything else that's been connected to this river? These owners solely have a vested interest in one thing; financial gain. Midas Gold has pitched their plan as a restoration project and puts subtle advertisements on things that are environmentally friendly such as bicycles you can rent and their docking stations in Boise. However, according to Idaho Rivers United, an organization that advocates for the protection of Idaho's Rivers and the I am writing to express my concerning and expansion of the Stabine Rime by Midas Gold has of on the East Fork South Fork of the Salmon River. I appreciate your time and consideration of my thoughts.	McCall Boise	ID ID
15	16	not a form letter Form Plus	should place a significant priority on protecting these fish, along with bull trout, and steelhead which are all protected through the Endangered Species Act. 193	194	not a form letter	Hi, My name is Jack, and i do not support mining in the South Fork of the Salmon river. You will receive many letter from Idaho rivers united. I read their letters, and know that they are right. From protecting self sustaining and economy sustaining wild and native fishes to protecting the economy that surrounds outdoor activities to just preserving clean water for us to drink, stop The Sibhite Gold Project. Illived in Idaho, I received my undergraduate degree in Ecology and Conservation biology. I Trinidad, I worked on biological monitoring projects assessing the impacts of mining on fish populations. I earned my Masters degree in Elagstaff Az, working with the AZGFD, USFWS, BLM and the with The Nature Conservancy to protect native fish habita and to undestrand why native fish recovery fails occeads. Mining operations, even with massive miligation efforts, will negatively affect water quality. Why should we care aside from loosing native species, or things of that sort? Money, Money lost due to the loss of tourism, money lost due to the cost of miligations, money lost trying to rehabilitate rivers and fish populations. We loose in the long run. I want to return to Idaho, and I want to help make it a better Idaho. I want an economy based on the wise and sustained use of natural resources. Extraction can only last so long, but we will see the downsides for decades or centuries to come. I trust in you to make a decision that is in the best, long term, interest of the state and for the natural systems that sustain our lives Please do all that you can to stop the Stibnite Mine Project.	Flagstaff	AZ

301	302	not a form letter	Please stop the Sibnite mine project! The story seems to go, environmental battles are waged until the resources are extracted People try to give a voice to the beings who don't have one. We're fighting for the future against greed. Who will profit from a gold mine which will devastate the landscape and leave a lake of poison for countless future generations? For gold? Mass resource extraction as a practice must end- the choice here is simple -what legacy do we want to leave? Please stop the Sibnite mine project! Please!	Spokane	WA WA

661	662		I urge you to take a closer look at the proposed Sithnite Gold Project. The DEIS is showing the project can be done safely and would mitigate undesirable effects of mining done during the past. I also urge you to support full development as Idaho rivers and our outdoor recreation commy are not able to sustain us without help from the minerals industry. We need to stop locking up our forest and minerals industries for the sake of outdoor enthusiasts. The two can co-exist. The Stibnite Gold Project would not cause undue harm to ESA listed fish, the irreplaceable recreational values of the region, and indigenous resources. The East Fork/South Fork of the Salmon fixer provides critical habitat for 3 Endangered Species Act listed fish species: chinook salmon, steel head, and bulltrout. This project would beneficiate the habitat for these species. According to the USFS website, the South Fork of the Salmon is designated as criticalchinook salmon habitat. "Within critical habitat, an agency must avoid actions that destroy or adversely modify that critical habitat." This project would comply with that mandate. The benefits of the Stibnite Gold Project would extend beyond fish, however. Improvements to roads and bridges would allow more people to use this area. Currently, access to this treasure of the outdoors is extremely limited. Idaho resources should be enjoyed and developed for all Idahoans, not just for sportsmen, anglers, and infrequent hikers. The South Fork Salmon River (and the East Fork South Fork) represent something special to citizens in Idaho and beyond. Whitewater paddlers and anglers travel from around the world to enjoy this irreplaceable river. Downstream from the mine site, the South Fork is suitable for Wild & Scenic designation which would impose even more strictures on its use, thus insuring more land is locked up in to perpetual very limited use only, to the detriment of all. Idahoans need jobs and income to be able to enjoy these areas, and good roads and bridges to get there. As an Idahoan

793	794		I have never been to the place this mine will be established in. I don't think I've ever been to the state of Idaho. But a person that I respect greatly is very passionate about this particular river, and I know for a fact that mining operations are terrible for marine ecosystems around them. Governing bodies can limit how destructive mining operations are, but they are necessarily destructive to some degree. We have more than enough gold, and an already too small and dwindling number of beautiful rivers in this country. I would like to visit Idaho some day, and I'd like to be able to come here and see a beautiful river rather than a monument to

			Idaho has been my home for 24 out of 28 years. I've made a living on the Salmon river working in Idaho's amazing outdoor industry. I love this state and all that defines it. This project - I do not love. This proposed mining project in an insult towhat we have going for us as Idahoans. We are a whitewater state. We have pristine, undamed rivers. We have anglers that come from around the country to experience Idaho's river corridors and to trout fishing. We have rafters and kayakers that spend years waiting to pull a Salmon/Selway lottery ticket. This mine threatens all of, that. The Stibnite Gold project will disrupt critical habitat for ESA listed species like bult rout, chi nook salmon, and steelhead. Increased traffic to the pine area and beyond threaten small		
877	878		streams exposing them to erosion, sedimentation and potentially hazardous material. There is no such thing as an environmentally friendly mine. There is no such thing as a well intentioned mine. The risk of spills, leaching, tailings dam failures is far to great and idaho/(dahoans deserve better. The promise of boom and bust jobs from a Canadian company and long-lasting environmental impairment is worth so much less than the outdoor economy and the draw of pristine environment that Idaho has fostered for years. This mine puts our public land at risk and it is a risk you shouldn'tallow. I urge you to support Alternative 5 - the No Action Alternative and do not support

989	990	not a form letter	I am a born-and-raised Idahoan, a whitewater boater, a former guide and have kayaked the East Fork South Fork Salmon River and South Fork Salmon River and South Fork Salmon River, in addition to the rivers it feeds and other rivers in our state, country and outside the US. I understand the potential detrimental impact the proposed mining project will have on this river system, to both the threatened fish populations (and reliantspecies) and the economic impact. Idaho's rivers provide drinking water, food sources, recreation, hydroelectric power and crucial habitat for fish and other wildlife species. Idaho's rivers are the lifeblood of the state's cherished open spaces and wild country and is the reason so many of us lovel living in this great state and the draw for other Americans to experience whatwe hold dear. Nobody wants to see Idaho's rivers soiled or abused, but often there's a dramatic imbalance between the desires of mining corporations and other interests and thesustainability of our unpolluted rivers, native fish populations and our outdoor recreation/tourism industry. There is more at stake than the short-lived profits of annon-US mining company and is NOT worth more than the values that everyday Idahoans cherish. Our Idaho economy can and will thrive on recreation and tourism, if we protect our precious resources, and this has not been addressed in the DEIS. Let's not put our most precious resources in potential danger. Please do all that you can to stop the Stibnite Gold Mine Project.	Ketchum	ID

			I'll be brief-I am a lifelong resident of the east coast. 3 years ago I left for the wesst looking for a place I could call home again. The only state that truly spoke to me was Idaho. I paddled multiple sections of the Payette River system, and backpacked in the Sawtooth mountains. I saw the landscape I had always envisioned as that		
1373	1374		was roand. I paddled multiple sections of the Payette Kiver system, and backpacked in the Sawtooth mountains. I saw the landscape I had always envisioned as that of the west-and I can't wait to spend much more time there. I greatly want to explore the region around the South Fork Salmon many times in the future, in an		
			undisturbed,natural state.

140	1443	1444	not a form letter	been in the South Fork of the Salmon country once and it was one of my favorite experiences I've had in my life. I would love to one day explore this area more and kayak, fish, and ski this area, but if this gold mine is put into place, It will harm many of the fish, polite the pristine clear water of the south-fork, and overall ruin much of that country. There are many more kids my age that feel the same and if this gold mine is put in, we will never be able to see the full beauty the south-fork has to offer.	Wilder	ID

1629		2 Form Plus	Please stop the Stibnite Mine Project. As an Idahoan, a public land owner, an avid outdoor recreationist and a scientist passionate about our lands, rivers, and the species dependent upon them, I urge you to support the No Action Alternative and forever half further mining at Stibnite. OurNational Forests and Idaho rivers and our outdoor recreation economy need our protection! Anadromous salmon are a "keystone" species in both aquatic and terrestrial environments, meaning they influence survival or reproduction of other species. Idaho Gro. Little veen implemented a Governor's Salmon Workgroup in April 2019 to address salmon and steelhead population collapse and continued substantial decline since the development of dams on the lower Snake River. Gov. Little is even quoted his wish to "develop effective salmon and steel head populations of salmon and steel head esist for present and future generations to enjoy." How can we continue to endanger habitat for these critical species when they are already facing so many assaults? Unfortunately, not only do the fish are have trouble getting to these headwaters, but now we are diminishing their chance for survival by destruction of important habitat and contamination of our water. Idahoans have protected and restored some of the best habitat for salmon andsteel head anywhere in the world – Let's continue to do sol Today, only two percent of historical populations remain. PLEASE HELP PREVENT THE EXTINCTION THESE SPECIES FOR SURVIVIALI Anadromous salmon are a "keystone" species in both aquatic and terrestrial environments, meaning they influence survival or reproduction of other species. The Stibnite Gold Project would significantly modify this critical habitat for chinook (and steel head and bull trout). Please stop the Stibnite Mine Project.	Ketchum	ID

2225	2226		I am writing in regards to the Midas Stibnite Gold Project. This major project in the headwaters if the South Fork of the Salmon is, I believe, not in the interests of diahoans. The South Fork is a pristine gem of a river that is accessible by road for much of its length lending to it tremendous value for recreation for all Idahoans. Part of the river runs through a near wilderness setting as well. All of this -recreation, wilderness character, fishing and water quality will be put at great risk by this project. The South Fork offers probably the best Chinook Salmon habitat in the Salmon River drainage and this should be protected. The South Fork in addition is important bull trout and steel head habitat. It is clearly important to Idahoans who care about these species and the future of fishing opportunities for them.		
		not a form letter	The South Fork has the best whitewater recreation in the Salmon River drainage and in an era where our other rivers (Main Salmon/Middle Fork/Hells Canyon) are at capacity in terms of recreation opportunities and permits to float it offers an amazing opportunity for river recreation. The comment period is inadequate. At a time just before the election this comment period should be extended to 120 days and not shortened. There are a lot of other things going on at this time and the public needs time to respond to these issues.	Pocatello	ID.
2227	2228	2	other things going on at this time and the public needs time to respond to these issues.	rocatello	10
