Dear Hannah Smith,

Sorry for being a little late, just wanted to voice my concerns on the building of the bike trails. One big concern I have is the impact this will have on the wildlife, especially the marbled murrelet, deer, elk, and any other wildlife that may be affected. This project will bring a lot more people and traffic to the 1004 road also what kind of water runoff will there be on these trails with the large down pours here on the Oregon coast. And lastly "Fire Danger" in the dry months and the impact of the garbage that could be brought in by people using these trails.

Thanks Ken Hurliman
