As a 94 year old Portal resident, I am deeply disappointed in a plan that includes a seasonal closing of the South Fork road. To the best of my knowledge, we have not been given any scientific data that would show harm to the local spotted owls. They have lived in proximity with vehicle traffic for many years and I hope that will continue for many more years.

This plan does not resemble the plan the Friends presented so long ago. Please reconsider this draconian plan.
