I'd love that Garry... I am also wanting to get up north when the road is open more for some microsale trees... I'll explain more later what the issue was there. Let's consider the week after next? I'm supposed to be taking all of next week off, but I'm expecting I'll work some. So I don't think I'll be successful in actually burning 40 hours of leave this pay period. Regardless, I WON'T be going in the field at all next week, that's off the table for me. Let's plan for something after that.

Lucy,

I agree with what Molly said below. Molly, maybe we can schedule a visit together in the near future if our schedules allow.

Thanks Molly. We can also ask folks going out to take pictures if it would help you at all...just in case you don't get a chance to see it in person. This project may have a pretty narrow IDT for the reasons you state below...

I have not been out to either. I don't necessarily need to get out to either I don't think... I am CC'ing Garry because we are both in the same boat on this I think... where our two resources don't necessarily need to see the road site in order to clear these projects. It's a permanent conversion of land use, and sell what's merchantable in the process. No managing the trees for the future to consider. I'd LIKE to go out there, so I have a visual and know what it's like. I am not sure when I'll try getting out there.

**Subject:** Status of Roads Access EA surveys?

Good morning: I'm trying to get a feel for where folks are at with getting out to review the three roads we are going to be moving forward in an EA (or if you actually need to)? Most folks won't have gotten out to Heceta I'm sure, but what about the other two? I'm starting with assuming you haven't gotten out there if I didn't hear you report out on it at Tuesday's IDT meeting, but I realize that may be an incorrect assumption... Thanks for updating me! Lucy
