

After Jennifer Eberlien was arrested
planning a protest and not forced
What's been happenin here is six
rivers National forests. Nothing from
fires from the past to fire this summer.
These dead trees are left. They fall, the
grass & brush comes in and it burns
again. The bugs roll in, kill what's left
of our tree. Then Drought. Dead trees
pile up on our forest floors. Some of
these pieces in our forests, you can't
even walk threw its so bad. The 6
river national forest don't want us
out in OUR forest Service lands. They
don't want us caught out in there because
a fire does breakout. Or they don't want
us to see how truly bad the fuel is
on our forest floors. What ever the
reason is. Something has got to be done.
Doing nothing isn't the answer!

We have several historical trails here.
The FS use to keep them clear. Instead of
ruin up & down our roads. Our fire
fighters use to clear trails. Back in the
70's. No maintenance is done anymore on
these trails. These trails could be used
as fire breaks. But no. 6 rivers just
removes these trail from their maps.

6 rivers could do way more than what they are doing here. Even nothing isn't the answer. Its no different than a veggie garden. weed it keep it clean & of course watered.

There is a lot 6 rivers could & should be doing. Lots of crap is going on here. But what needs to happen. Our own fire fighters were told to clear out. Or you fired. So many of the fire crews took off their uniforms & went to work! Saving several homes. Our own fire fighter were told to stand down or be fired! They brought in fire crews from all over our country. Instead of our own crews, who knew our forests here. How crazy is that. The Forest Service need to take a look into their own (6 Rivers) and find out who gave these orders to fire them! From the top to the bottom!

I feel that there is far more FS could do & won't. The FS dist are all different Shasta Trinity does all sorts of things for our forest to be used & enjoyed. 6 rivers does nothing. We too could have a great recreation area, like Shasta Trinity & several others Dist that want us to enjoy.

Yes would like to see way more forest management in our forests. Our forests are a mess. Lotsa waste. Load of animals killed. Lone pine ranch counted several hundred dead deer & cattle. Many birds lost their lives as well. So the animals that our forest served are gone. Will be years for wildlife to recover from all this. Our forest are no longer safe to be in because of the forest service not take'n care of the woods. Ben left on their own -- Our forest are know'n out of control with huge amounts of fuel left behind & under the trees they claim to be saving. All I can see. Is animal disappearing because the fur tree are take'n over & Squeezin' the wild life out. Deer don't eat fur trees.

Bring back the animals by getting rid of them nasty fur trees. They are a weed & are used up animal feed! As well as space. The animals live on the fur thickets edge. There is no food for them in fur choked forest & devore. Nif fawne
