To Whom It May Concern:

Objection to Carson Plan

I concur with Amigos Bravos in their objections concerning the Wild and Scenic River Eligibility Determinations and inappropriately Reassessed Streams for Wild and Scenic River Eligibility.

Please include all 62 segments of all eligible rivers and streams in the National Wild and Scenic Rivers System and address inaccurate language in the Plan relating to the Outstanding National Resource Waters. I am also concerned with seeps and springs and water quality standard language; eliminate the phrase “for designated uses” and “surpasses”.

In fact, I agree with all the Amigos Bravos educated assessments and suggestions for remedies in the current plan. Nothing could be more important right now than making every possible effort to protect our watershed. I am particularly concerned about the chlorination of the Phoenix Spring at Taos Ski Valley and how that affects the Rio Hondo at the headwaters, and would like to know just where the jurisdiction of the Forest Service begins in the Kachina Basin. I assume the Phoenix spring is on private land.

Thanks for your time and energy.

Phaedra Greenwood Levy
