Subject: File code 1950 Ozark Veg Management
Date: Tuesday, January 12, 2021 1:31:51 PM

This is Anne McClendon with
"The Friends of the St. Francis."

I understand the St. Francis was recently completed on this vegetation management but I did not reply to the earlier notice.

What I would like to suggest is that the Forest Service go back to prescribe burning as in the "old days."

Especially in the mid west and west National Forest. But at the same time I suggest in all Forest.

So much of the Forest Service financial resources are spent on fighting fires instead of personal and management.

I assume you will pass this idea on to through the chain of command.

Thank you for your consideration in this matter .

Anne McClendon
