I will write some stuff and send it to heather. In short I gave Kevin and copy of the amendment 22 of our forest plan. See attached.

While one might could argue one way of the other about what the 2012 ea did not address the amendment clearly states boating is not allowed on the main stem except on 17miles as.....

Attached is the first page. I gave Kevin a copy of the whole admendment. I think his only recourse in the near future is through our forest planning process.

He will wait until he see our office reply. I think I have a copy of the Judge's decision and it may give some context to what DOJ/OGC argued. I think I remember reading something along those lines but I may have been the judges words and not DOJ.
