U.S Forest Service
8510 Mendenhall Loop Road
Juneau, Alaska 99801

The following are my suggestions to the Mendenhall Glacier Visitor Facility Improvements Project for your consideration:

- Goal: To protect, preserve and provide appropriate, meaningful and challenging management of the Mendenhall Glacier's environment, its natural beauty and wildlife.
- A. No motorized traffic on the Mendenhall Lake
- B. No buildings/structures blocking the view of the Mendenhall Glacier
- C. No traffic/structures that will disrupt the fish, birds, plants and wildlife
- D. Invite and coordinate the appropriate participation of community members, businesses, Native corporations, schools and organizations in working to achieve the goal of the Mendenhall Glacier project
- E. Take advantage of teaching opportunities by providing "learning areas" for children and adults

Thank you.

Sincerely,

Judy Franklet
