Map NZ-K Cottonwood Creek

Shoshone National Forest Travel Management Comments

I would like to suggest an alternative to the original proposal for NZ-15 lower portion, Cottonwood Creek area.

Instead of looping back to 213.3B as indicated on the original proposal, continue up 215 which turns south, make a loop and then back (see Google Earth picture). This would eliminate the terrain problem associated with connecting to 213.3B and displacing non-motorized users as stated in the rationale.

Roads 215 and 218 were on the 1990 motorized travel map issued by the Shoshone National Forest (see attached).

This route could also be a seasonal road to eliminate the hunting season concerns—possibly June 1st to August 31st.
