Dear Sirs and Madames,

The Forest Service has managed to totally screw up the habitat for wildlife by both logging and permitting endless travel , via 4 wheeler , truck and snowmobile. To the detriment of Moose , Bear and Elk , and Lynx, Which lived in those woods until about 15/20years ago.

The wildlife corridor has been fractured by hiway Power line , road and snowmobile trail , and logging and burning etc..

I recommend as little motorized travel as possible, and we, at the B4 Ranch use the road only when Necessary. We do ski and drive our snow cat occasionally.

Sincerely,

Douglas S Hart
