To: Mr. Rob Robertson

Re: Current proposal WR-26, and Bear
Creek Road (FS-501)

Dear Mr. Robertson

I am writing this letter in regards
to the current proposal WR-26 and more
specifically Bear Creek Road (FS-501)!

I appreciate this "open comment period"
and value the consideration you are
giving to forest travel management.

In regards to the proposed action to
limit access on Bear Creek Road to
ATVs (≤ 65 "wide), I urge you and your
colleagues to give consideration to a
prescribed period (2-3 years) where limited
seasonal access be put in place (particularly
wet season - early spring).

After establishing a period of study, with attention to restricted traffic in the wet season, a mindful decision with data in hand could be made with attention to impact upon the riparian & wetland regions under consideration.

I believe that such a staged thoughtful analysis of data collected from the field would serve all concerned.

Frankly, allowing only ATVs (<65" wide) will likely promote larger number of vehicles on the road and without seasonal restrictions may exacerbate road rutting & local environmental damage.

Finally,

For those individuals that derive their income from recreational outfitting, such as Bear Basin Adventures, a road restriction action now without thoughtful study would impose a significant financial hardship.

(3)

I ask that you give Thoughtful
consideration to a Staged study
of the Seasonal impact of road
closure (Bear Creek Road FS-501) prior
to a final action that would restrict
access to vehicles $< 65'$ wide

Please do not hesitate to contact me
with any questions.

Dr. Gary L. Hedlund
