Re: Travel Management Plan

Please note our opposition to closing the Bear Basin road to pick-ups over 65" wide. This road provides vital access to a permitted outfitting and guiding operation that relies on trucks to haul large camp items necessary to run their unique operation. The outfitter serves the entire public and provides access to our vast public lands and that use should continue. Let's not discriminate against users who hire an outfitter because he can provide amenities that enable them to enjoy the Washakie Wilderness safely.

Respectfully,
Jim Allen
