Subject: Motorized Travel Management Proposed Action
Date: Friday, June 24, 2016 8:41:57 AM

Dear Forest Service,

We are proud of the Shoshone as a “backcountry forest,” and grateful that there are no additional motorized routes in the Wiggins Roadless Area, with improvements like balancing non-motorized winter recreation at Deception Creek.

Please enforce and maintain its existing route system before adding new motorized trails, and provide a plan for adequate staffing and a secured budget for signing, closing and decommissioning unauthorized routes under a set, timely deadline. Please promote and maintain the South Zone’s already outstanding loop opportunities.

75% of individual Wyoming commenters on the Forest Plan opposed additional motorized development on the forest. Travel Monitoring documented more illegal and unauthorized motorized use in areas with the highest road density. More roads and more loops= more illegal use.

Thank you.

Best,
Scotty McGee
