The state of national forests in Wyoming is of great concern to most of us. Please do everything you can to reduce the damage done by off road vehicles and avoid adding new trails and roads. We know that your staff is so underfunded that you are having trouble keeping current levels of damage down. Adding more access will only make the enforcement problem worse, and encourage our overweight population to “experience” wild places while sitting on their posteriors rather than in more healthy ways.

Richard R. Klene
