**Subject:** Proposed changes to FS-501 proposal (WR-26)  
**Date:** Friday, July 22, 2016 9:36:37 AM

---

My Name is Bob Naylor previous owner/ operator/ outfitter of Bear Basin Camp located at the end of FS-501 in the Shoshone National Forest.I am commenting on the proposed changes.

Although I understand the interest and concern for the proposed changes (Protecting environmental damage to riparian areas) proposal (WR-26). i don't believe the changes would achieve those goals while at the same time put undo burden on the Forest Service permittee who is providing service to the public. To assume that by just eliminating larger vehicles you will solve the problem is wrong. Since the introduction of ATVs I believe the road has degraded to a greater extent.

I also believe the road use should be grandfathered in to the current permittee no matter what the final decision. This is not the first time the road use has been discussed. Promises were made to previous permittees and those should be honored. It is important to have a good steward in the area which is the permitted Outfitter. The Forest Service and permittee are Partners.

I hope these decisions are not made with assumptions. Please look at all that are affected.
