Map NZ-F Rattlesnake

Shoshone National Forest Travel Management Comments

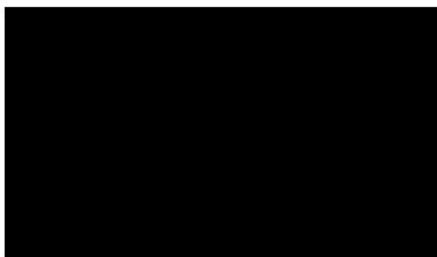

I would like to propose an addition to NZ-34. There is a small spur, probably user-made, that goes northwest of 401.A to an overlook of upper Pat O'Hara Creek.

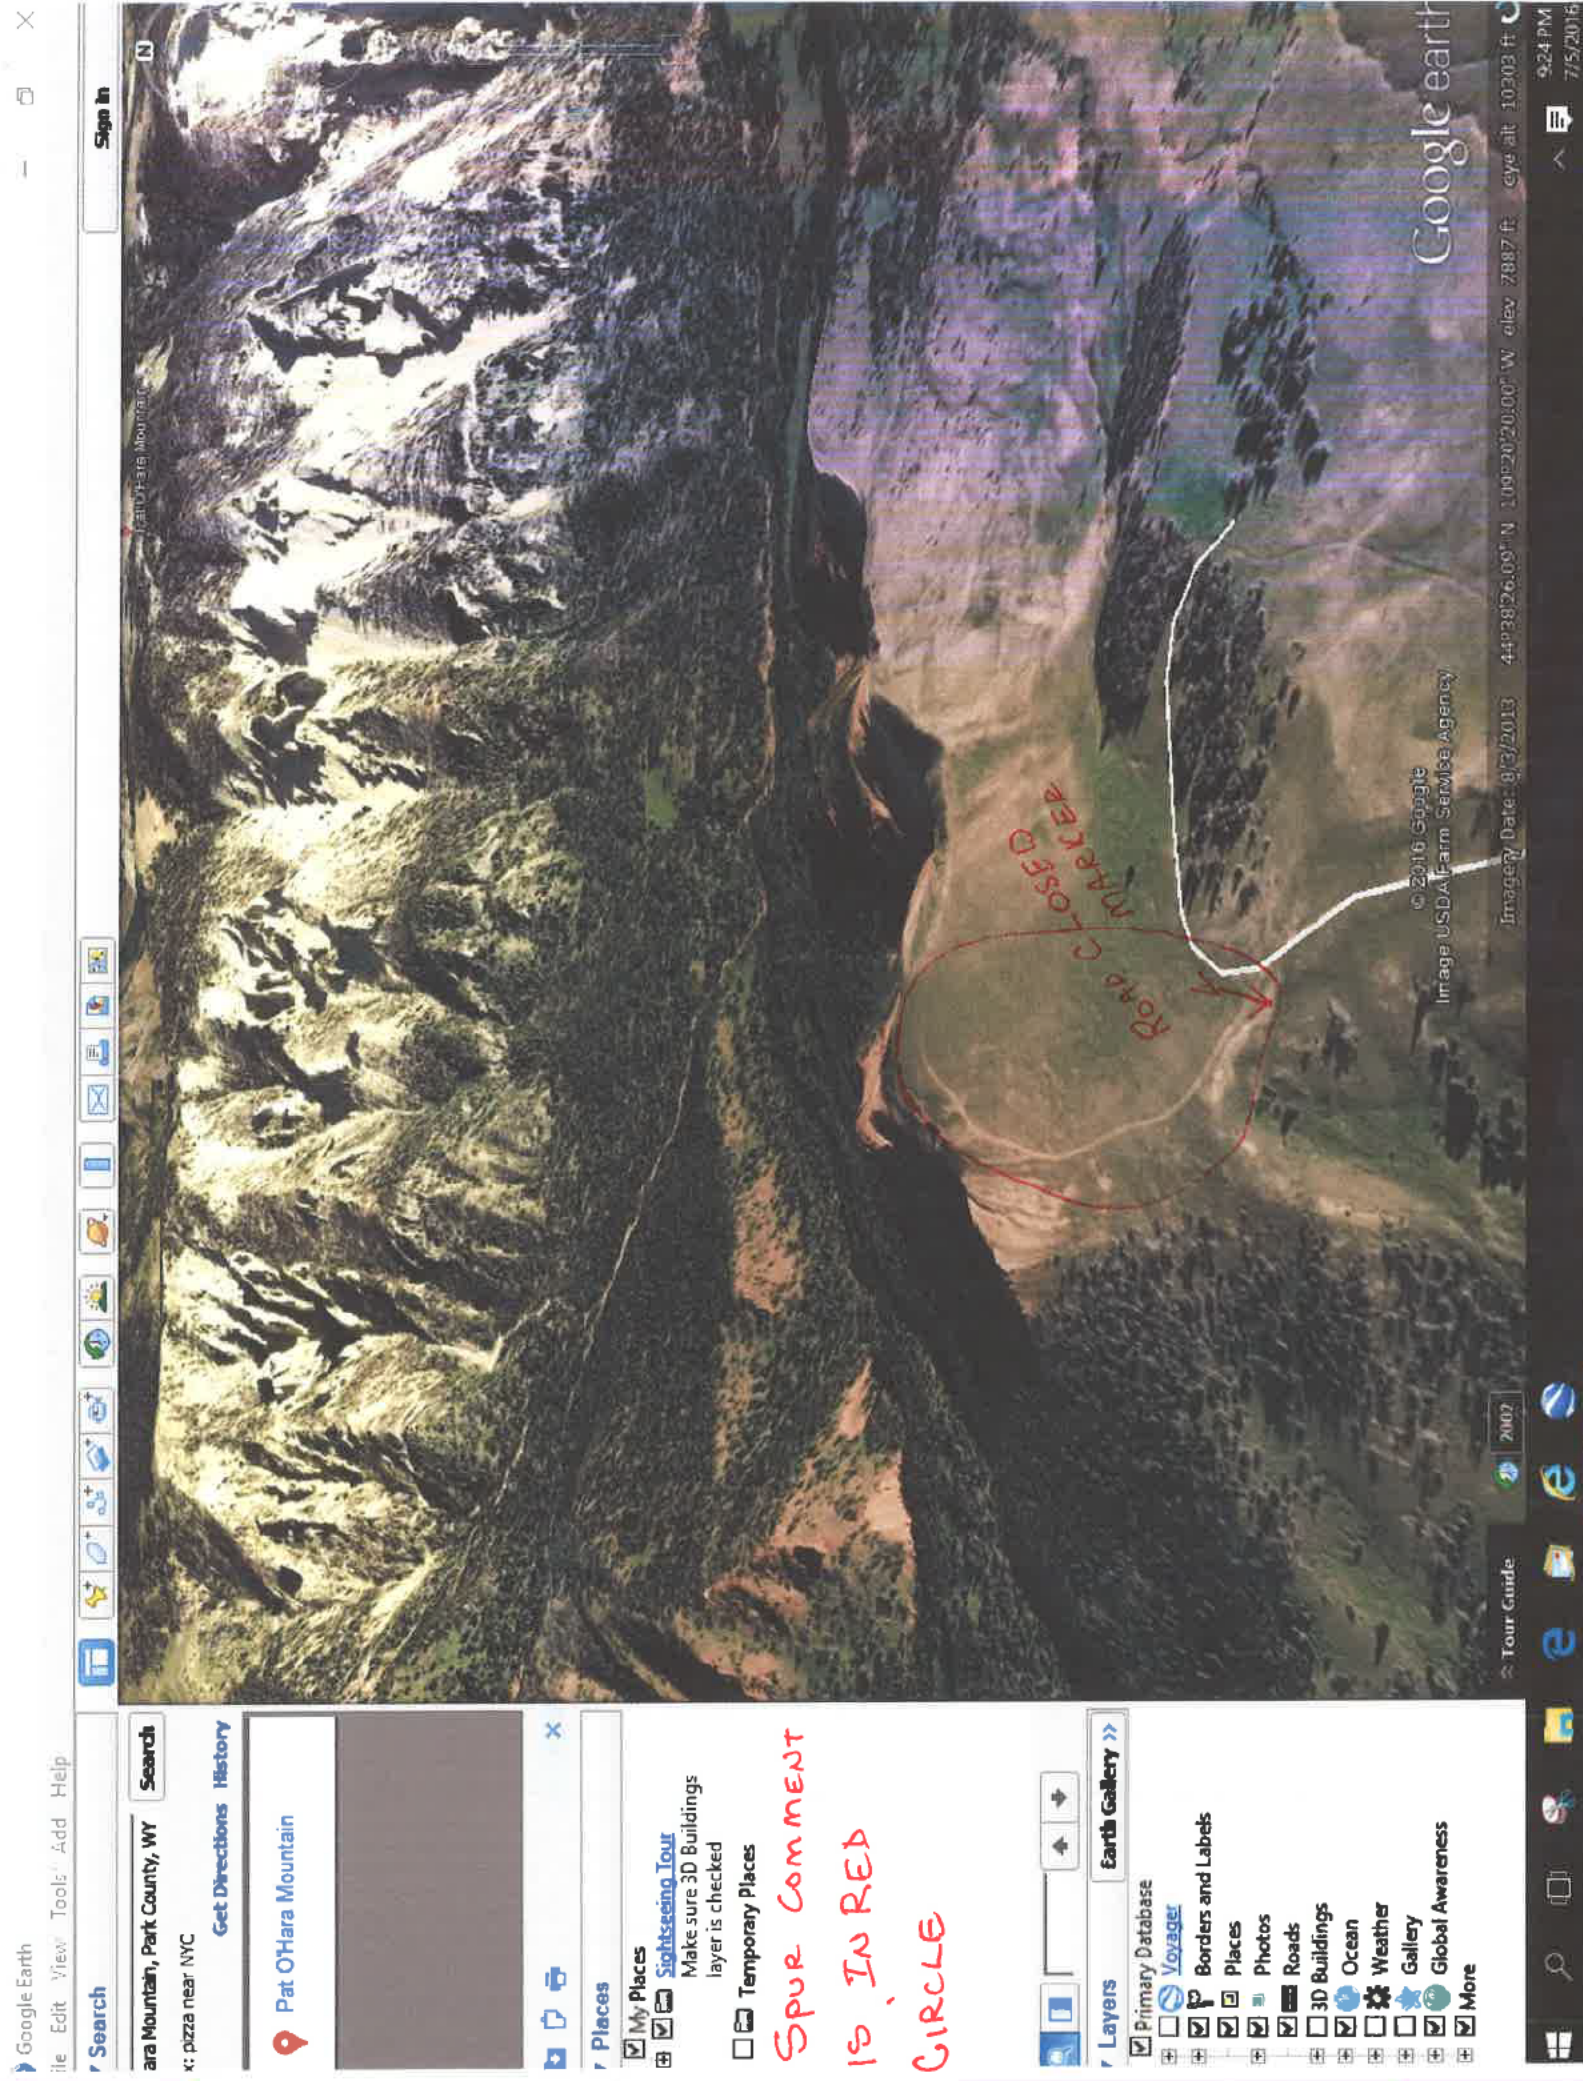

It is a spectacular view of a valley below and often elk and even grizzly can be seen. This would allow older and handicap motorized users to take in the view, which they could not do on foot.

I doubt if this spur is any more than one-quarter mile and would also have few resource concerns.

Attached is a copy of Google Earth with the spur highlighted.
